

# ULTRASPRAY

Industrial Fireside Cleaning Concentrate & Protectant

## BENEFITS OF USING ULTRASPRAY

- Cleans down to the bare metal
- Harmless to metal surfaces
- Makes boiler cleaning easier and more effective
- Helps to maintain maximum boiler operating efficiency
- Allows greater access to areas that can't effectively be cleaned with brushes and reamers
- Leaves behind a corrosion inhibiting film which makes future cleaning easier and more effective

---

**ULTRASPRAY** is a liquid concentrate, specifically designed for cleaning and corrosion proofing the metal fireside surfaces of all types of boilers.

- \* Firetube
- \* Watertube
- \* Cast Iron Sectional

---

**ULTRASPRAY** is used to penetrate and soften "baked-on" fireside scale deposits and eases the task of fireside scale removal.

---

As little as 1/16" of fireside scale can reduce heat transfer efficiency by up to 25%, resulting in nearly 8% fuel losses.
